NO ASSEMBLY REQUIRED.**GROUND FAULT CIRCUIT INTERRUPTERS**

If you plan to use your TURBO Ionic Dryer in a bathroom, install a GFCI now!

Contact your local electrician to determine which type is best for you. Options include a portable unit that plugs into the electrical outlet or a permanent unit installed by your electrician. GFCI's are now required by the National Electrical Code for all bathrooms, garages, and outdoor outlets.

Why install a GFCI?

A regular fuse or circuit breaker won't protect you from electrical shock if your dryer falls into water. Even if the dryer switch is "OFF," a non-GFCI outlet will lead to electrical shock. A GFCI offers protection and can save lives!

ALCI Safety Device

This hair dryer is provided with an Appliance Leakage Circuit Interrupter (ALCI), a safety feature that renders the unit inoperable under some abnormal conditions, such as accidental immersion in water. Please use the ALCI safety test button to make sure that it is operating effectively before use.

1. Plug in the dryer and press the test button on plug.
2. The reset button will pop out and the appliance will stop working.
3. Unplug the dryer and press the reset button. Then reinsert plug into outlet.
4. If ALCI test button is not working, return dryer to nearest service center.
5. If immersion occurs, bring unit to service center and do not try to reset.
6. Repeat the test every time you use the device.
7. Should the unit go off and the reset button pops out during use this may indicate a malfunction. Unplug the unit from the outlet and allow the unit to cool. Reinsert plug and begin use.

Cool Shot

The Cool Shot feature locks in your style by closing the hair shaft. Press and hold the Cool Shot button to blow a cold stream of air on your finished look. Release the button to return to warm airflow.

Concentrator

The removable concentrator nozzle creates more powerful airflow, styling accuracy and control. Point the TURBO Ionic Dryer with the concentrator at a 90° angle to the section you are drying and run the brush under it, working from roots to ends. Keep the concentrator pointed downward at all times and never let it touch the hair.

Diffuser

Use the diffuser to create natural looking curls that are full of bounce and body.

1. Towel dry hair and squeeze out excess water.
2. Apply your favorite mousse, gel or anti-frizz serum.
3. Fit the diffuser onto the end of the TURBO Ionic Dryer and turn it on low heat, and low to medium air flow.
4. Place the diffuser on your head near the roots and begin moving it around the head in a circular motion.
5. Use the prongs on the diffuser to gently lift the hair and dry underneath it.
6. Once the roots are dry, work your way down to the ends of the hair by continuing to massage in a circular motion.
7. Use the diffuser to push up the curls from below to help retain bounce and shape.
8. Continue to massage hair in a circular motion all over head until hair is completely dry.

Drying Basics

1. Towel dry hair to remove excess moisture. Blot with the towel rather than rub the hair to avoid causing excess frizz and split ends.
2. Comb through and detangle the hair with a wide toothed comb.
3. Plug TURBO Ionic Dryer into an electrical outlet and turn it on by rolling the heat selection switch up from the OFF position.
4. Select heat and speed.
5. Direct the TURBO Ionic Dryer at the hair and not the scalp. Begin by briskly blowing it all over the hair to remove excess water.
6. When hair is mostly dry, section the hair and begin to style. Begin at the nape of the neck and brush hair while following the motion with the TURBO Ionic Dryer. Work up to the scalp, sides and front of the hair.
7. Once desired style is complete, press the Cool Shot button to set the style and lock in your look.

Styling Tips

Body & Volume

For extra body and volume, turn head upside down while drying. Direct the TURBO Ionic Dryer's airflow at the roots for lift. When hair is dry, flip hair back and style into place with a brush.

Straightening

Separate hair into sections and use a large round brush or paddle brush to brush hair from underneath. Hold hair taut while drying each section and run the TURBO Ionic Dryer down the length of the hair several times until dry. Curve the ends slightly under as you brush down the shaft. Repeat with all sections until completely dry. Lock in the style with the Cool Shot.

Curls & Waves

Set the TURBO Ionic Dryer to a low heat and speed setting. Move the TURBO Ionic Dryer around the hair while scrunching the hair in your hand with your favorite styling product. Continue until tousled, natural-looking waves are completely dry. Lock in the style with the Cool Shot.

Hair Care Tips

1. To prevent burning scalp or damaging hair, keep the TURBO Ionic Dryer roughly 8 inches away from head.
2. Always point the dryer down the hair shaft to smooth the hair cuticle for silky and shiny looks.
3. For a smooth and salon-like blowout look, finish by styling with the InStyler MAX 2-Way Rotating Iron.
4. For quick and easy touch ups between shampoos, simply use the TURBO Ionic Dryer to restyle.
